CAREER OBJECTIVE

Computer Science student with a strong interest in full-stack development and problem solving. Eager to apply my skills, learn from experienced engineers, and build impactful software.

TECHNICAL SKILLS

Languages: C++, Java, Python, JavaScript, SQL, HTML, CSS

Frontend: React.js, Angular, Bootstrap, CSS, Vite

Backend: Node.js

Databases: SQL

Tools & Platforms: Git, GitHub, VS Code, Linux

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Responsive Web Design, REST APIs, Open Source Collaboration

PROJECTS

Admin Dashboard

GitHub | Live

- Built a fully interactive admin dashboard using React, Tailwind CSS, and Recharts featuring real-time analytics, dynamic charts, and role-based user management.
 - Implemented CRUD operations for user records, live order status transitions, and search/filter functionality while maintaining a fully responsive interface across devices.
 - Structured the project using reusable React components and a consistent design system for improved readability, maintainability, and future feature expansion.
-

AI4AI Open Source Contribution

GitHub

- Contributed to an open-source AI platform by redesigning and enhancing the application's user interface to improve visual consistency and overall user experience.
- Collaborated using Git and GitHub workflows, creating feature branches, submitting pull requests, and incorporating project feedback during development.

- Strengthened understanding of collaborative software development through real-world open-source contribution practices.
-

Green City

GitHub

- Developed a responsive web application promoting smart and sustainable urban living with an intuitive and user-friendly interface.
 - Implemented modern frontend components to improve usability, responsiveness, and accessibility across desktop and mobile devices.
 - Organized reusable UI components and optimized page structure for improved maintainability and performance.
-

EXPERIENCE

Hackathon Participant (2 Hackathons)

- Collaborated in cross-functional teams to design and develop software solutions within limited time constraints.
 - Contributed to frontend development, UI implementation, problem solving, and project presentation while working in an agile team environment.
-

PROBLEM SOLVING

- Solved **80+ Data Structures and Algorithms** problems on **LeetCode**, strengthening knowledge of arrays, strings, two pointers, bit manipulation, sorting, searching, and problem-solving techniques.
 - Continuously practicing algorithmic thinking and coding interview preparation.
-

CERTIFICATIONS

- AWS Certified Cloud Practitioner
-

EDUCATION

Parul University — Vadodara, Gujarat, India

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Expected Graduation: **2029**

CGPA: **8.90 / 10.00**
